

CONSULTING | TECHNOLOGY | PROFESSIONAL & MANAGED SERVICES

At InfoSpekta, we are dedicated to addressing the complex business challenges faced by Federal Government agencies in Financial, Budget, Procurement, Grant Management and Information Technology (IT) Support Services.

When it comes to technology, our approach prioritizes aligning technology solutions with your organization's strategic goals, ensuring that technology serves your business, not the other way around.

Key Capabilities

Best-in-Class Resources: We pride ourselves on assembling a team of industry experts and professionals who bring extensive knowledge and experience to solve business challenges. Our people are our greatest asset in delivering exceptional results. We don't just hire; we curate. Our selective recruitment process ensures that each team member embodies our core values of innovation, excellence, and dedication to delivering results that exceed expectations.

Data-Driven Solutions: We specialize in harnessing the power of data to provide insights that drive informed decision-making. Our data analytics expertise allows government agencies to enhance financial strategies, support audit remediation, optimize data reconciliation and reporting. Using unified data analytics platform, we accelerate harnessing the power of Artificial Intelligence (AI) to provide business insights and predict future trends.

We have a strong focus in:

- Enhancing Financial Strategy
- Supporting Audit Remediation
- Optimizing Data Reconciliation and Reporting
- Unified Data Analytics and Artificial Intelligence

Business Transformation: We excel in streamlining operations to achieve organizational excellence in pursuing business transformation. Our tailored approach involves meticulously analyzing existing workflows, identifying inefficiencies, and implementing strategic optimizations. We empower Federal Government agencies to achieve peak efficiency by leveraging technology and process reengineering. We don't settle for the status quo. We solve problems with a keen eye on automation opportunities to remove bottlenecks, eliminate redundancies, enforce compliance measures and optimize workflows.

We are dedicated to:

- Streamlining and Optimizing Workflow
- Automation with a Purpose
- Ensuring Compliance
- Future Proofing your Organization

What Sets Us Apart

Fusing Business Insight with Tech Expertise: Our professionals combine business acumen and analysis with technical expertise within a holistic implementation framework to ensure your success.

Innovation as Standard: We deliver innovative solutions aligned with your strategic business goals.

Your Success is Our Priority: Your unique business needs and objectives are our primary focus, with tailored services to exceed your expectations.

Past Performances

The success stories of our collaboration with federal agencies speak volumes about the impact of our solutions.

Internal Revenue Service (IRS) - The IRS Enterprise Life Cycle Program Management Office (ELCPMO) offers frameworks for all enterprise-wide projects. To support the ELCPMO, we provided subject-matter expertise in development practices, conducted rapid delivery analysis, and implemented agile best practices in collaboration with the IRS during the development and implementation phases.

United States Department of Health and Human Services (HHS) - Situated at the intersection of policy, technology, and strategy, our DATA Act engagement supported HHS in publishing its federal spending data under the OMB-issued Digital Accountability and Transparency Act of 2014 (DATA Act), and we worked on designing an effective, compliant, and reliable reporting solution for HHS to submit data to Treasury

U.S. Department of Veterans Affairs (VA) - At the Department of Veterans Affairs (VA), we meticulously documented the methodologies, analyses, assumptions, and data employed in the development and annual update of the Enrollee Health Care Projection Model. This model projects Veteran enrollment, health care utilization, and expenditures for a comprehensive 20-year horizon into the future.

National Institutes of Health (NIH) – At the National Institutes of Health (NIH), our expertise takes center stage as we play a pivotal role in delivering comprehensive Information Technology Project Management Office (IT PMO) support. Our dedicated efforts are specifically tailored to empower the National Institute on Aging (NIA), ensuring seamless and efficient IT project management.
